Huzeyfe Burak Arslan

AI and Data Engineer

Hello, I'm Burak, an artificial intelligence and data engineer. In my projects I focus on scalibility, aesthetics, and usability in order to create well-designed, eye-catching, and useful products. Through my work I will ensure that your product will be loved by the customers. The projects I worked on used in real-life and recieved a lot of positive feedback. I like working with both engineering and design teams. Always love being involved in constructive discussions. Thanks to my client meetings I have attended in many countries and my knowledge of fluent English and Turkish I can communicate with clients and colleagues all over the world. I'm looking for job opportunities where I can join a creative and ambitious team and work on a new exciting projects.

Education

Bachelor's degree, AU and Data Eng
Istanbul Technical University, Istanbul
2020-2026;

Languages

- Turkish (native);
- English (C1, advanced);

Skills

Technical

Programming Language:
C#, Python, Dart;

Design Tools:
Figma

Architectural Patterns:
MVMM, Riverpod

AI-Assisted Coding:
Prompt engineering, agent pipelines

Professional

- Team communication skills
- PowerPoint
- LaTeX
- Market analysis
- Product Design and Mock-ups
- Marketing Material Design

Work experience

"Visionbase", London, UK,
Jan 2025 - Jan 2026

Remote - Product Manager
"Pioneer in the field of CCTV decoding & enhancement systems in law enforcement"

- Scrum and Agile workflows
- Github projects
- Well formated Github PRs and issues
- Task management

Jan 2023 - Jan 2025

Remote - Software & UI/UX Engineer

- C# and WPF Development
- App Deployment to Stand-alone environments
- MVVM Architectural Pattern
- Media Authentication (Image and Video)
- Decoding Pipelines for CCTV Footages
- Design Principles
- Figma Product Mock-ups

"TOFAS", Bursa, TR,
July 2022 - Aug 2022

On Site - Software Developer Intern
"One of Turkey's biggest automotive R&D and production company "

- Parser for robot codes to detect fixed tuckers
- Create a data for machine learning algorithms.

"Datablast", Istanbul, TR,
Mar 2022 - Jun 2022

Remote - Software Developer Intern
"Datablast help businesses harness their data, transforming it into actionable insights "

- Python parser for SQL.
- Demonstrate how the data moves through a script
- JavaScript to create a webpage that displays the flow

"ITU Vision Lab", Istanbul, TR,
Feb 2021 - Feb 2022

On Site - Undergraduate Student Researcher

- Fine-tuned signature detection and verification model
- Mobile application with React-Native for end-user scenarios

Awards and Sertificates

- I took part in a hackathon organized by a silicon valley start-up Mentorloops and I have recieved **"AI and Education Technologies First Place Award"**
- Google **UX Design** Certificate. Coursera
- **Machine Learning** by Andrew Ng, Coursera

Volunteer Activity

ITU Cave Exploratory Club

Member

Oct 2021 - Present;

- An active member of ITUMAK since 2021. ITUMAK strives for the discovery, mapping, and preservation of caves in Turkey.
- Visited Caves: Dupnisa, Cinlikuyu, Taşoluk, Karlık

Bursa Education and Youth Association

Volunteer Project Manager
